# Group exercise on waste

*Reflect on the waste situation in the state  
were you live;*

1. How is the situation today?
2. What are the reasons?
3. How is your vision of a good waste management?
4. What needs to be done to reach the vision and tackle the problems?
5. Who is responsible for the implementation of a better waste management?
6. What can you do personally in your role as an SPCB?
