**Summary Statement on progress made by local body in respect of
Solid Waste Management in Madhya Pradesh**

S. No	Indicator	Status as on 31.03.2022
1.	% Collection & Transportation	406ULBs
2.	100% Segregation at source	406ULBs
3.	Waste processing facilities (population >1 lakh)	34/34
4.	Geo-tagged waste processing facilities (population <1 lakh)	343 ULBs
5.	Home Composting facilities	(6.6 Lakhs House holds doing home composting)
6.	Material Recovery Facilities	404 ULBs have 417 functional MRF facilities that are operational.
7.	Legacy Waste – Remediation	86 on going remediation 50 remediation completed.
8.	Wire Mesh Installation	1847 wire mesh installed in storm water drains.
9.	Home Composting	6,64,124
10.	By Laws framed under Rule - 15 of SWM Rule 2016 Penalty collected in the By Laws framed	—
11.	CCTV Camera Installation at Dumping Sites	Indore, Katni, Jabalpur, Ujjain, Bhopal
12.	Separate storage, collection and transportation of construction and demolition wastes	406 ULBs have dedicated areas to keep C&D waste
13.	Current Status of ISWM Project	05 ISWM projects in various stages of implementation (04 WTC) PPA issue re- solved for Rewa. Construction of power plant is in completion stage.
14.	Current Status of Decentralized Solid Waste Facilities	UADD has Decided 2 form new Clusters for remaining 346 ULBs to adopt Decentralized Solid Waste Management Model
15.	Status of SWM in 01 WTE Clusters	WTE Jabalpur project has started and Rewa is under implementation.
16.	Status of state policy formation for C&D Waste	Drafted. Currently under final review with Cabinet.
17.	GPS Installation in vehicles collecting Municipal Solid Waste in ULBs having population more than 1 Lakh	5423 vehicles are fitted with GPS.

List of 406ULBs with wet waste processing facility
(Data as per Swachh Bharat Mission MIS yr. 2022-23)

Summary Statement on Progress made by Local Bodies in respect of Waste Collection, Segregation, Transportation and Disposal

In order to comply with the Solid Waste Management Rules, 2016 following steps have been taken by the state:-

1. **Waste Collection :-** 100% door to door collection of the waste has been achieved in 406 ULBs. 69,455 waste pickers (Permanent, Contractual, Casual/Daily Wagers and Informal Waste pickers) for solid waste management system have been engaged and provided source of livelihood through this integration.
2. **Waste Segregation:-**100% Segregation at source of waste has been achieved in all 406 ULBs. The ULBs are segregating dry waste into different components such as plastic, wood, paper, glass, cardboards, etc. 641.10 Metric Ton of plastic waste was utilized in road construction. Many ULBs supply Refuse Derived Fuel to cement factories as Alternate Fuel & Raw Material (AFR). Other ULBs are also selling segregated dry waste to junk dealers for recycling.
3. **Waste Transportation :-** ULBs transporting the segregated waste in covered vehicles from transfer stations to the processing facilities. As per the mandate, all towns / cities with more than 1 lakh of population are required to have GPS fitted garbage collection and transportation vehicles. In Madhya Pradesh, there are 34 towns with more than 1 lakh population. Total 5,423 vehicles have been deployed for collection and transportation of municipal waste. All 5,423 vehicles with ICT based monitoring system for collection and transportation of municipal waste.
4. **Waste Processing/Treatment :-** The cluster based Integrated Solid Waste Management model adopted by the state is working in 04 clusters that are in various stages of implementation. This covers a total of 60 ULBs. Out of 04 cluster, 03 cluster are waste to compost (Sagar, Katni and Rewa) and 01 Cluster is waste to energy (Rewa).

The Power Purchase agreement (PPA) issue has been resolved for Rewa WTE cluster (28 ULBs) they will be setting up waste to energy plant now.

The State is planning to implement solid waste management through 'Decentralized Solid Waste Management Model' (Standalone Model) in 6 ULBs.

The State is also finding it difficult to select suitable private players in remaining cluster mainly due to unavailability of "right" PPP partners with technical know-how and financial capacity. Hence, the state has devised an alternate 'Decentralized Solid Waste Management Model' with processing facilities at ULB level to ensure effective implementation of SWM Rules, 2016. This approach is already working in Ujjain city which has waste to compost facility for processing 190 TPD of waste.

All 406 ULBs are processing Wet & Dry waste through functional facilities. 256 ULBs process their plastic waste. This is based on the assumption that ULBs are processing plastic waste as well through their MRF facility. 406 ULBs have 418 Material Recovery Facilities (MRF) facilities that are operational.

406 ULBs have started collecting domestic hazardous waste. The processing and disposal of domestic hazardous waste is being done through installation of incinerators by ULBs and / or by having tie ups with agencies that process domestic hazardous waste. All 406 ULBs have started processing domestic hazardous waste (Sanitary Napkins, Pads).

5. Initiative

3R – Reduce, Refuse Reuse and Recycle

The State is focusing 3R, this is based on community involvement to reduce waste generation. Following actions have already been taken in this direction: -

- All 406 ULBs have taken different measures to reduce generation of Dry/Wet Waste;
- Total 1107 RRR centres of which 621 are permanent and 486 are temporary, a total of 220,377 citizen visited RRR centres in which 80,640 used plastic, 92,059 used clothes, 84,185 old books and 47,757 items were collected.
- Some of the initiatives taken by the ULBs on 4R principles are: ban on single-use plastic, home composting, bartan banks, cloth banks, extensive IEC activities (such as rallies, meetings, workshops, campaigns) and involvement of SHGs NGO, Market association RWAs youth citizen representatives in extensive door to door campaigns for source segregation, onsite composting and multiple sanitation awareness activities.

6. Home Composting

The State has been actively promoting home composting in order to move towards Waste Reduction at source. As per March 2023 MIS updated by ULBs, the number of households practicing home composting have increased from 2,60,252 households to 6,61,463 (increase by 20%).

7. Model Tender:-

The State has taken an initiative to frame “**Model Tender**” to ensure quality at ULB level in procurement of plants and equipment for Solid Waste Management or Sewage Treatment. Model documents and model estimates have been prepared at State level to provide handholding support to ULBs. The documents have also been prepared for procuring machinery and setting up infrastructure like MRF Facilities, Bio- methanation plants.

8. Waste Disposal:- Presently the solid waste generated in the State is being processed through multiple approaches-

i. **Waste to Energy (3 Clusters)**

The waste to energy plant operating in Jabalpur is first of its kind, fully operational Municipal Solid Waste Plant in India with a capacity of 11 MW. This plant is currently processing waste of 16 ULBs. One more Integrated ‘Waste to Energy’ clusters are under implementation in Rewa Cluster. Gwalior Cluster to process waste from 44 ULBs is under termination. It will be retendered.

ii. Waste to Compost through integrated approach (3 Clusters)

03 Clusters are waste to compost (Sagar, Katni, and Singrauli) is under implementation stage.

iii. Decentralized (Standalone)composting

Bigger ULBs such as Bhopal, Indore and Ujjain have standalone waste to compost facilities to treat the waste of entire city. Total 347 ULBs including Bhopal, Indore and Ujjain Standalone projects, have created decentralized composting methods for wet waste processing (Examples- Windrow Composting, NADEP Composting, Vermi Composting, etc.)

iv. Bio-Methanization/Bio-gas

Bhopal, Indore, Ujjain and Dewas have set up Bio-methanization plants for converting wet waste to gas. Indore has 3 plants with a total capacity of 37 TPD, Bhopal has five plants with a total capacity of 17.5 TPD, Ujjain has one plant with capacity of 5 TPD and Dewas has one plant with capacity of 0.2TPD.

9. **Legacy Waste** :-The legacy waste remediation work has been undergoing in the various ULBs of the State. 50 ULBs have remediated 100% of their legacy waste and the land has also been reclaimed. As per the directions of the Hon'ble Tribunal, other ULBs of the State are also in the process of remediating their dump sites and in all probabilities. State has prepared the DPRs and RFPs with the help of External Consultant and is in the process for Legacy Waste Dumpsite remediation.
10. **Policy & Bye-Laws** :-The Urban Development & Housing Department of the State Government has notified "Solid Waste Management Policy-2018" on 05.09.2018 under Rule 11 (1)(a) of SWM Rules 2016. 310 ULBs have framed bye-laws under Rule 15 of Solid Waste Management Rules, 2016.
11. **Public Awareness** :-The State has adopted an inclusive strategic model for IEC-BCC initiatives to bring the desired changes in the community behavior and ensuring ownership among citizens and communities towards cleanliness. UADD have IEC-BCC initiatives target broader spectrum of cleanliness factors covering DTDC, source segregation, involvement of innovative technologies in sanitation, hygiene practices, etc., and creating awareness on health and environmental benefits among masses. The State's IEC-BCC Campaigns have targeted all the key stakeholders including Resident Welfare Associations (RWA), Educational Institutions, Businesses, Community Leaders, Sanitation Staff, Bulk Waste Generators, etc.

This year State has organized many 1 day campaign such as Construction & Demolition Waste, bhago single use plastic, bottle collection drive, water bodies cleaning red and yellow spot, faecal sludge collection and transportation, Swachhta March, Toilet 23, Swachh Bazar zyadavypaar, Har din twin bin etc. to engage citizens focus on urban sanitation issues. through this initiative UADD have focused the implementation of 3R IEC-BCC activities in urban community. Through this massive campaign UADD had targeted reduction in less waste generation, waste collection and management, promotion of home composting, Use of cloth bags, reduction of single use plastic etc. through public participation. This campaign got huge participation from ULBs, citizens and community groups & covered more than 30% of urban population through direct and indirect reach.

UADD have distributed 3.5 lakh cloth bags through community and CSR.. This is symbolic activity and plastic ban message was propagated through this in communities.

The ULBs have also developed "**Kabad se Jugad**" places at prominent locations in the cities, to aware citizens to reuse the generated waste. During this campaign cities have converted over 1500 garbage vulnerable Points (GVPs) into beautiful spots by using waste materials like old tires, paint buckets, automobile waste etc.

UADD have also focused to strengthen the material recovery facilities (MRFs), by focusing standard management and monitoring, this will impact on processing of plastic and other dry waste in the ULBs. Campaigns have targeted all the key stakeholders including Resident Welfare Associations (RWA), Educational Institutions, Businesses, Community Leaders, Sanitation Staff, Bulk Waste Generators, etc.

Apart from above mentioned activities ULBs are regularly communicated waste and uses of plastic waste reduction through the traditional communication methods like garbage collection vehicles, on ground and social media campaigns, placement activities in mass media, FM radios, online media etc. Due to the covid scenario, during the reporting year in the state, UADD have stopped mass gathering activities to protect our citizen from any possible infection. But Govt. have promoted this issue through social and digital mode regularly.

12. **Achievements :-** The Ministry of Housing and Urban Affairs, Government of India conducts nation-wide Swachh Survekshan survey under Swachh Bharat Mission. The efforts being taken by the State for effective disposal of waste and cleanliness, have been reflected in the rankings of Swachh Survekshan 2022, wherein Madhya Pradesh has been declared as the Cleanest State of India.

In addition, Indore has been declared the cleanest city of the country for the last 6 years; Bhopal has been declared cleanest Sustainable State Capital in Swachh Survekshan 2022

- Madhya Pradesh was ranked 1 State in >100 ULBs category in Swachh Survekshan 2022
- Indore has been declared the cleanest city of the country for the last 6 years; Bhopal has been declared Cleanest Self Sustainable State capital in Swachh Survekshan 2022
- 20+ towns are among the top 100 cleanest cities in the country in last Swachh Survekshan
- Indore has become the first "7 Star Garbage Free City" in India
- 23 Cities are certified "3 Star Garbage Free City", 73 Cities are certified as "1 Star Garbage Free City" 1 City is certified as "5 Star Garbage Free City" and 1 City is certified as "7 Star Garbage Free City" by Gol in SS2022.
